

FOLLOW THAT DROP!

Take the journey of a water drop and discover how water from a reservoir is turned into water that is clean and safe for us to drink!

This special dual site visit enables learners to see behind the scenes of the Hope Valley Water Treatment Plant and participate in related hands-on 'water' science at the SA Water Learning Centre led by SciWorld presenters.

Find out about our mains water - where it comes from and what happens to it before you turn on your tap.

Teacher resources available.
